EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. The application has been amended as follows:

In The Specification:

On page 1, line 8, after "09/809,860" insert - - now U.S. Patent No. 6,664,648, - -.

3. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to suggest the claimed method, particularly coating a curable compensating layer having an initially pasty consistency substantially with full coverage onto one of the lower contact area of the integrated circuit and the carrier element wherein the curable compensating layer increases in volume upon curing.

Fjelstad (U.S. Patent 6,486,003) teaches a method of joining a semiconductor chip to a dielectric film wherein an expandable structure is placed between the chip and film. The leads are electrically connected and then the expandable structure is expanded. The expandable structure is disclosed as a thermoplastic film or elastomer with a foaming agent that expands by heating the thermoplastic to soften it and vaporize the foaming agent and is disclosed as being rigid before the expanding step (See Figures 3A-3B; Column 2, line 57 to Column 3, line 40). Fjelstad does not disclose the

expandable structure as being curable. Furthermore, there is no suggestion in Fjelstad of using a curable compensating layer having an initially pasty consistency that increases in volume upon curing.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
